# What is Dental Braces Treatment?

Dental braces are orthodontic devices used to align teeth, correct bite issues, and improve overall oral health. Braces gradually move teeth into the desired position, creating a healthier and more attractive smile.

## Benefits:

- Straighter Teeth
- Better Oral Hygiene
- Improved Chewing & Speech
- Enhanced Confidence

ABHA CARE

# Signs You Need Braces

- ✔ Crooked or Misaligned Teeth
- ✔ Overcrowded Teeth
- ✔ Gaps Between Teeth
- ✔ Overbite or Underbite
- ✔ Jaw Alignment Problems
- ✔ Difficulty Chewing Food

Early treatment can prevent future dental complications.

ABHA CARE

# Types of Dental Braces Available

- **Metal braces (traditional and affordable):** Most common and cost-effective option.
- **Ceramic braces (less visible):** Tooth-colored brackets for better appearance.
- **Lingual braces (placed behind teeth):** Hidden braces attached to back of teeth.
- **Clear aligners (invisible and removable):** Comfortable and nearly invisible option.
